Projects

Madrigal: *Ruby on Rails, React.js, Redux, PostgreSQL*

[Github/Live](#)

A RESTful single page playlist-making web app inspired by 8tracks.com

- * Manages audio and image uploads using Paperclip gem and AWS S3 to increase data retrieval and app scalability
- * Utilizes partials and modular components in playlist to simplify and maintain DRY code
- * Implements custom front and back-end user authentication using BCrypt gem to ensure that users are keyed to the correct playlists

[Code Intensive]: Ruby on Rails

[JS Project]: Javascript, probably

Skills

-Ruby, Ruby on Rails, React, Redux, SPSS, Weka, HTML, CSS, Git, JQuery

Education

App Academy, New York City, NY

Intensive 80+ hour/week full-stack programming school (graduated February 2018)

University of North Texas, Denton, TX

BA –Psychology (graduated August 2016)

Work Experience

Research Assistant (January 2017 – September 2017)

Human Intelligence and Language Technologies Lab, University of North Texas

- * Assigned behavioral codes to annotated and analyzed therapy transcripts for use in Natural Language Processing
- * Used IBM SPSS and Weka, a statistical modeling tool and machine learning suit respectively, to identify trends in said transcripts for further analysis
